A stronger

Nilfisk-Advance is a financially strong company ready to fulfil our vision to become the number one company in the professional cleaning equipment industry.

As a result, an increasing number of innovative, competitive products will reach the market in 2003 and 2004, and we will have a strong capability to bring the new products to market through our market channels.

Nilfisk-Advance has during 2002 and the first half of 2003 strongly improved its operating performance and market presence. This improvement was secured despite the weak world economy, which made the demand situation for our products difficult. These results were underpinned with intensified investments in product development and reinforcement of our market presence through investments in sales and service resources.

Global presence

The global market for professional cleaning equipment is estimated to be worth around EUR 4.5 billion. This includes sales of floor maintenance machines and vacuum cleaners to commercial and industrial users, markets which Nilfisk-Advance services globally. Nilfisk-Advance is the market leader in Europe. Global presence is ensured through 31 sales companies with central locations in all main markets in the US, Europe and Asia. In other markets our products are sold through Nilfisk-Advance agents. Depending on the specific market conditions, Nilfisk-Advance sales companies sell directly to end-users through its own sales organization or through specialized cleaning equipment distributors.

Nilfisk-Advance in Europe

17 Nilfisk-Advance sales companies with more than 700 employees and a large number of dealers, secures that Nilfisk-Advance has a full sales and service coverage of European markets. 200 service engineers with fully equipped service vans and an equal number of service engineers with our distributors perform the after sales service. This is to ensure that our end users at all times obtain the maximum efficiency from their Nilfisk-Advance cleaning machines. During the first 9 months of 2003 new sales companies were established in Russia, Poland, Czech Republic and Greece.

Product development

Key to the continued success of Nilfisk-Advance is the ability to supply high-quality products at competitive prices. In this context, quality means long life, high-quality cleaning, ease of use, and all-round reduction in customer cleaning costs. To meet these requirements Nilfisk-Advance must have a profound insight into trends and customer needs so that - by means of effective innovation, a short product development cycle and design skills - attractive products can be brought to market.

Johan Molin,
President and CEO

Logistics

All markets in Europe are supplied directly from the European Distribution Centre in Copenhagen Denmark. This ensures a very high delivery performance and reduced distribution costs for both partners, distributors and customers.

The product catalogue

It is our objective with the present catalogue to give you a complete overview of the Nilfisk-Advance product range. For further technical or commercial information please do not hesitate to contact our local sales company or your closest Nilfisk-Advance partner.

E-commerce and web based information systems

Nilfisk-Advance has invested heavily in the development of an E-commerce system which enables our partners and distributors via the web to access all relevant product information, and place and track their orders directly with Nilfisk-Advance. Partners can also access the my.nilfisk-advance.com site which contains all relevant marketing material as well as an electronic parts catalogue. From this site marketing material including product application pictures can be downloaded conveniently.

With Europe's widest assortment of commercial vacuum cleaners, Nilfisk-Advance offers the cleaning professional the exact solutions needed for superior productivity and performance. Nilfisk-Advance set standards in the business, like the new HDS 2000, the quietest vac in the world combining high performance and incredible low sound.

Commercial Vacuum Cleaners Overview

GD 110

Innovative high performer

UZ 934

Quiet, lightweight and compact

GD 1000

Power in a quiet, lightweight design

GD 930

Silent cleaning power, chosen by millions of customers

GD 2000

Minimum sound level meets maximum suction performance

UZ 964

Hip mounted vacuum cleaner for crowded areas

BACKUUM

The most ergonomic backpack vacuum

GU 350A/450A

Single-pass carpet cleaning

GU 700A

The GU 700A a heavy-duty machine

WD 200

Highly efficient wet and dry vacuum cleaner

UZ 878

High capacity and two speed versatility

GW 210/220/235

Outstanding performance in their class

Commercial Vacuum Cleaners

GD 110

Innovative high performer

- Noise reduction system gives a lower frequency and softer sound
- Optimum suction power
- Lightweight with large rear wheels and front swivel castors allows fantastic manoeuvrability
- Robust chassis made of recyclable polypropylene and ABS

Nilfisk GD 110 is a truly innovative commercial vacuum cleaner with a technically advanced design. Full consideration is given to the need for low operating costs and high productivity. Ideal for offices, hotel rooms and shops.

UZ 934

Quiet, lightweight and compact

- Low sound level 61 dB(A)
- Wide working radius
- Lightweight (6.1 kg)
- 10 litre dust bag

Nilfisk UZ 934 offers the best combination for commercial cleaning; powerful performance and easy portability. Its compact size and light weight make it easy to use and store.

	GD 110	UZ 934						
- IP PROTECTION CLASS	IP20	-

Commercial Vacuum Cleaners

GD 1000

Power in a quiet, lightweight design

- Powerful 1200 W motor (dual speed in GDS 1010, HDS 1005 and HDS 1010)
- Very quiet: 55 dB(A) (BS 5415 standard)
- HEPA filter: 99.997% particle retention down to 0.3 microns (HDS 1005)
- Possibility for bagless use reduces overall operation costs

Nilfisk GD 1000 series represents the ideal choice for commercial cleaning tasks. The best choice for daily cleaning of carpets and hard floors in hotels, restaurants, offices, recreational facilities and building lobbies. A very low noise level allows daytime cleaning.

GD 930

Silent cleaning power, chosen by millions of customers

- Extremely quiet, but high cleaning performance
- Rugged, heavy duty construction
- 15 litre dust bag
- Two speed system on GD 930S2 bringing sound level down to 49dB(A)

Nilfisk GD 930/930S2 is a world class dry vacuum cleaner for effective daily cleaning of large areas. GD 930 is the reliable choice for demanding cleaning applications in hotels, schools, offices and hospitals.

Commercial Vacuum Cleaners

UZ 964

Hip mounted vacuum cleaner for crowded areas

- Machine weighs only 2,9 kg
- Left or right hand operation
- Toner vac available (Servac)
- Aircraft version available (400Hz)

The obvious choice for vacuum cleaning in theatres, cinemas, shops, coaches and aircraft and a great complementary duster. Makes cleaning from staircases, ladders and scaffolding easy.

BACKUUM

The most ergonomic backpack vacuum

- Low weight (4.5 kg), high cleaning efficiency
- Easy to put on and carry around, reduces back strain
- Patented, self adjusting shoulder straps and hose coupling adjustable for left or right handed use
- HEPA filter versions are available for dust free environments

Nilfisk BACKUUM™ is setting standards for comfort and efficiency for backpack vacuum cleaners. The unique and revolutionary ergonomic design increases operator mobility and makes it easier to clean confined or cluttered areas, such as cinemas, theatres or offices.

Commercial Vacuum Cleaners

GU 350A/450A

Single-pass carpet cleaning

- Low noise level 68 dB(A)
- 4 stage filtration captures 98.3% of dust particles down to 0.3 microns
- Flat to the floor design (14 cm profile) for cleaning under furniture
- Built in extension hose and telescopic tube for cleaning hard to reach areas

GU 700A

The GU 700A a heavy-duty machine

- 64 cm cleaning path
- 2 vacuum motors
- 1 brush motor
- Built in hose and tube for "hard to reach" areas

GU 350A/450A is designed to lie completely flat so you can reach areas without moving furniture. The machines operate extremely quietly and are therefore ideal for cleaning in hospitals, hotels, conference centres and for daytime cleaning in offices.

The GU 700A is an optimal upright solution for daily vacuum cleaning of carpets. The GU 700A is a heavy-duty machine for vacuuming large areas of carpet. This lightweight machine makes operations easy and pleasant.

Commercial Vacuum Cleaners

WD 200

Highly efficient wet and dry vacuum cleaner

- Empty tank via drain hose or by tipping
- First rate suction power
- Easy to manoeuvre
- Excellent filtration (main filter never in contact with water)

The WD series is perfect for professional use in the food and beverage industry, large kitchens, pool areas and other places that need to frequently wash floors, pick up spilled fluids or remove polish remnants after scrubbing. Ideal for any hard floor or carpeted surface.

Commercial Vacuum Cleaners

UZ 878

High capacity and two speed versatility

- Dual 1000 W motors for power and versatility
- Big 45 litre net capacity tank
- Rust proof and corrosion resistant polyethylene tank
- Excellent filtration

GW 210/220/235

Outstanding performance in their class

- 3 models offering 10, 20 or 35 litre capacity
- Convenient on board tool storage
- Easy emptying
- Robust chassis made of recyclable polypropylene and ABS

Nilfisk UZ 878 features both practical design for easy and fast operation, as well as the versatility that can only be found in a high quality unit. Used for either wet or dry pick-up applications, the large tank offers high capacity for long use between emptying.

Nilfisk GW 210/220/235 is a range of compact wet pick-up vacuum cleaners, designed to give high quality performance in a simple economic package. The price to performance ratio is, therefore, truly outstanding.

Your ticket to profitable new opportunities

Think about it

First of all, lower labour costs. Plus, staff positions filled more easily, since more people are willing to work "normal" hours.

These are two obvious benefits, but there are important less obvious ones as well. Such as customer relations and cleaning efficiency.

Daytime cleaning increases building occupant's respect for cleaning staff, since occupants will see the cleaning personnel perform.

It also helps the cleaning staff to know how the building is utilized, which areas are heavily used, which areas are hardly used at all. This aids planning and reduces unnecessary cleaning.

Since both the cleaner and the customer are on the job at the same time, it's far easier to build meaningful communications. Discuss cleaning issues and get valuable feed-back. In short, do the job in a more efficient way.

Through on-going dialogue with the cleaner immediate cleaning needs are handled, if this is part of the contract.

Save on cleaning costs

Daytime cleaning has always made sense. But previously, noisy, cumbersome cleaning equipment made it impractical. Now, thanks to well-designed, low-noise, compact cleaning machinery from Nilfisk-Advance, daytime cleaning is not only possible, it's the smart thing to do !

Listen to what some of our customers say about the Nilfisk GD 2000.....

Josef Katzer, Executive Manager of the Katzer GmbH and Chairman of the Contract Cleaner Federation Hamburg, Germany, says:

"This is a potential money saver. I can easily see the benefits of cleaning more efficiently during daytime, and the GD 2000 has lots of features that further help me cut my costs."

Claus Lindbjerg, Anders Andersen Cleaning, Denmark, says: "This machine has everything a great professional vac needs. And the sound level is almost unbelievably low"

Mr. Bohumir Andrla, Czech Republic explains, "The Nilfisk GD 2000 series is simply the quietest commercial vacuum cleaner available in the market today and it still delivers superior suction power".

According to numerous industry experts, daytime cleaning is the wave of the future and will revolutionise the cleaning industry. One American industry consultant, for example, cites a 5%-10% savings in cleaning budgets with daytime cleaning. Another says positive comments from building occupants outnumbered the negative 20:1.

Industrial Vacuum Cleaners

Nearly a century of experience in producing industrial cleaning equipment has given us a clear picture of what you look for in a professional vacuum cleaner – reliability, high suction power, task-specific filtration, safety and ease of use.

With our expertise in process integrated cleaning, manufacturing area cleaning and daily office cleaning, we can provide end-to-end cleaning solutions for the vast majority of industrial operations.

We continue to develop both machines and accessories to meet the growing demands in a dynamic world, e.g. coloured nozzles tailor made for the food and beverage industry.

Industrial Vacuum Cleaners Overview

GM 80P

Rugged construction for any cleaning job

GS/GM 82

All-task industrial vacuum cleaning

GM 625/626

Makes industrial cleaning easy

GB 726/826

Industrial vacuum cleaners withstanding constant use

IV 022

Flexibility for multi-purpose industrial cleaning applications

IV 040

Flexibility for multi-purpose industrial cleaning applications

GS/GM 83

Moderate to heavy-duty vacuum cleaning

Second-to-none in suction power

IV 055 - IV 075

A heavy duty performing I-vac

IV 110 - 150

Heavy duty cleaning for your biggest challenges

IW 2050

Nilfisk IW 2050 removes swarf, metal chips, oil and lubricants

ID 2050

Nilfisk ID 2050 removes dry waste and dusts

VB 733/833/933/1033

The VB range of suction / blower units

Industrial Vacuum Cleaners

GM 80P

Rugged construction for any cleaning job

- Impressive 2100 cm² main filter for even and stable airflow and vacuum, even after long use
- Lightweight but built for years of heavy duty cleaning
- Virtually indestructible aluminium container
- HEPA/ULPA filters optional

Nilfisk GM 80P is light in weight, but a heavy-duty performer. Reliable and designed to provide the durability and capacity required by cleaning professionals. Mounted on a strong steel trolley with large rubber wheels, the machine is easy to manoeuvre.

GS/GM 82

All-task industrial vacuum cleaning

- High efficiency
- Compact, robust design
- Easy to manoeuvre
- Fixed floor nozzle for cleaning of large floor areas

Nilfisk GS/GM 82 is a competitively priced all-purpose vacuum cleaner. It is suitable for picking up dust and light solids, and for overhead cleaning. GS/GM 82 is ideal for general cleaning in all industrial settings.

Industrial Vacuum Cleaners

GM 625/626

Makes industrial cleaning easy

- Multi task vacuum cleaners
- Outstanding suction
- Easy to manoeuvre and easy to drop bin
- Exhaust filters are available (HEPA or ULPA)

GM 625/626 are well-suited to machine cleaning, raw material extraction and processing industry, spillage pick-up, overhead cleaning and cleaning of large floors, e.g. in warehouses and production sites. The oval design makes them highly mobile and easy to manoeuvre in confined areas.

GB 726/826

Industrial vacuum cleaners withstanding constant use

- Superior filtration
- Low noise level with built in sound suppressor
- Easy to empty drop bin
- 3 phase motor for continuous suction

Nilfisk The GB 726/826 can effectively remove everything from fine dust to larger solids. The vacuum cleaner's three-phase motor provides a very high, constant suction power, making them especially suited to running all day in production integrated applications.

Industrial Vacuum Cleaners

IV 022

Flexibility for multi-purpose industrial cleaning applications

- 3 phase 2.2 kW
- Choice of 5 filter variants
- Large dust containers, mild steel and stainless steel
- Available in dust class L, M, H and ATEX versions

18

Nilfisk IV 022 combines heavy-duty power with manoeuvrability and a remarkably low noise level. The excellent filtering and large dust container is extremely effective for dry pick-up usage, while liquid kits are available for spills and wet applications. Stainless steel options are also available.

Industrial Vacuum Cleaners

IV 040

Flexibility for multi-purpose industrial cleaning applications

- 3 phase 4.0 kW
- Choice of 5 filter variants
- Large dust containers, mild steel and stainless steel
- Available in dust class L, M, H and ATEX versions

Nilfisk IV 040 combines heavy-duty power with manoeuvrability and a remarkably low noise level. The excellent filtering and large dust container is extremely effective for dry pick-up usage, while liquid kits are available for spills and wet applications. Stainless steel options are also available.

GS/GM 83

Moderate to heavy-duty vacuum cleaning

- High efficiency and superior filtration
- Large dust capacity
- Rugged and proven construction
- Easy to empty drop bin

Nilfisk GS/GM 83 has a 14,300 cm² large filter area and up to 3 x 1,200 W of power providing excellent performance and ensures efficient filtration. Ideal for heavy swarf and large dust volume removal in industrial settings.

GB 833/933

The heavy-duty performer

- Unsurpassed filtration
- Long machine life, induction motors
- Very robust construction
- Large capacity dust container

GB 833/933 handles anything from bulk amounts of dust, to boiler cleaning and continuous suction in connection with production processes. Also ideal for pneumatic transport of material where control of dust is an issue.

Industrial Vacuum Cleaners

GB 1033

A super-powerful industrial vacuum cleaner

- Outstanding suction and superior filtration
- Long machine life, induction motors
- Very robust construction
- Manual or automatic starter with or without neutral (0)

GB 1133

Second-to-none in suction power

- Incomparable suction power
- Excellent suction and superior filtration
- Long machine life, three phase motor
- Very robust construction

GB 1033 is the ideal choice for removal of large quantities of dust, swarf and other waste, either from large distances or when several work stations need cleaning simultaneously.

Nilfisk GB 1133 is one of the largest and most powerful industrial vacuum cleaners in the Nilfisk range. It is so efficient that you can have as many as five people working off the same machine. Equipped with a 13 kW ring compressor motor which provides extraordinarily high vacuum and airflow.

Industrial Vacuum Cleaners

IV 055

A heavy duty performing I-vac

- 5,5 kW side channel blower-choice of 5 different main filters-Stainless steel dust container available-Available in dust class L,M, and H

IV 055 I-vac manoeuvrable and easy to handle. Equipped with long lasting, durable side-channel blower. Excellent filtration, and 130 l dust container makes this machine extremely effective for dry pick up in a variety of applications, both pick up at source and as the heart of a fixed installation.

Industrial Vacuum Cleaners

IV 075

One of the smaller heavy duty cleaners in the IV-range

- 7,5 kW side channel blower-choice of 5 filters-dust container in mild and stainless steel-available in dust class L, M, and H

IV 110

Heavy duty cleaning for your biggest challenges

- 11 kW side channel blower-choice of 5 filters-150 l dust bin in mild steel, stainless steel as option-available in dust class L, M, and H

IV 150

Makes tough jobs easy

- 15 kW side channel blower-choice of 5 filters-150 l dust bin in mild steel, stainless steel as option-available in dust class L, M, and H

The IV 075 is the smallest of the large I-Vac's from Nilfisk-Advance, yet still big enough to handle real heavy-duty cleaning jobs in industries such as iron and metal, ceramics, brick and concrete etc.

The IV 110 is made for the heavy duty industries of this world, iron and metal factories, foundries, wood works, ceramics, brick and concrete industries etc.

The IV 150 is made for the heavy duty industries of this world, iron and metal factories, foundries, wood works, ceramics, brick and concrete industries etc.

Special Applications Centre

What the customer wants

Nilfisk-Advance strives to meet the customers' demand for a variety of cleaning needs with an extensive range of products. But when special requirements arise that cannot be met with standard equipment, we are able to provide the engineering skills and experience to develop specially adapted products. Customers from a number of different sectors, such as the food & beverage and pharmaceutical industries for example, have benefited as a result.

Health and safety

Hazardous or nuisance dust and fumes can often create a problem in the workplace that cannot be handled by standard machines. We can provide the systems to ensure a safe and healthy environment. Whether the demand is for the handling of flammable materials, hazardous waste – such as asbestos or potentially explosive materials such as flour dust, we can always provide a safe and reliable solution.

The right tools

When it comes to customising systems for specific industrial applications, Nilfisk-Advance has the resources and capabilities to develop special accessories to ensure that the project is successful. We can customise everything from single applications to full scale dust and fume extraction systems for production facilities.

Increasing productivity

Thanks to our extensive knowledge of machines and applications, we have the capability to make small adjustments to standard equipment, thereby significantly increasing the usability and productivity of the machines. Similarly, our ability to provide large scale solutions to avoid production shutdowns can increase the productivity of entire manufacturing plants.

Central cleaning systems

Fixed pipe systems can provide a cost-effective and practical solution in large facilities such as warehouses, factories and assembly plants. Nilfisk-Advance can design and install a central cleaning system that meets the specific demands of the facility.

Scrubber/dryers

Our years of industry-leading experience have taught us how to make a machine capable of doing a really excellent job of cleaning the floor. But that in itself is not enough! We also make our scrubber-dryers simple to use, because if the operator is unsure or confused, the cleaning result will suffer - regardless of how good the machine is.

We also make them easy to maintain and service, and we build them to last - no matter how tough the working conditions are. Our scrubber dryers quietly, efficiently and quickly scrub the floor, vacuum up the liquid and leave the floor dry, streak-free and spotlessly clean, all in a single pass. Walk-behind or ride-on models available.

Scrubber/dryers Overview

BA/CA 340/ET

Nilfisk CA/BA 340 faster and more efficient than mopping

CA 240/330

A compact multi-purpose mini scrubber/dryer ideal for light daily cleaning

BA/CA 450/530/610

Compact, reliable and easy to manoeuvre

BA/CA 430S/510S

The intelligent design ensures fast effective floor cleaning

BA 550/650

Heavy-duty for tough cleaning tasks

BA 750/ST/850/ST

Experience and innovation results in a new generation

BR 600S/650S/700S/800S

Total versatility in ride-on scrubbing and drying

BR 850/C/C-XL

40% faster scrub and sweep in one pass

BR 1100/C/C-XL

High productivity machines for heavy-duty cleaning

Scrubber/dryers

BA/CA 340/ET

Nilfisk CA/BA 340 faster and more efficient than mopping

- Twice as fast as mopping, removes the dirt instead of evening it out
- Unique design permits cleaning under furniture and right to the edge of the floor
- Scrubbing and vacuuming in forward and reverse
- Easily transported

Nilfisk CA/BA 340 and CA 340ET are the smart alternative to mopping. An automatic scrubber/dryer leaving your floors spotless. There is no slippery residue and no aching back. The series is perfect for maintenance of hard floor in small areas, e.g. stone, tile, cement, marble, rubber, vinyl, etc.

CA 240/330

A compact multi-purpose mini scrubber/dryer ideal for light daily cleaning

- Only compact machines to combine cleaning performance with all surface versatility
- Exceptional brush pressure, up to 0.29 kg/cm²
- All tanks are accessible and removable for easy emptying, solution change and cleaning
- Very low noise level due to the belt drive system

Nilfisk CA 240/330 are quick and effective, these cleverly designed multifunction scrubber/dryers make it possible to wash, mop, scrub and dry all surfaces including profile floor and non-slip safety floor, which are very difficult to clean with traditional machines.

Scrubber/dryers

BA/CA 450/530/610

Compact, reliable and easy to manoeuvre

- Ergonomic handle reduces operator fatigue
- Brush click on/off
- Symmetric brush on/off system allows left/right cleaning to the edge
- Traction drive optional (standard on BA 610)

Nilfisk BA/CA 450/530/610 are compact automatic scrubber/dryers leaving floors clean and dry in a single quick pass. Excellent drying on turns. The clear, pictorial display puts all controls within easy reach and simplifies operation.

Scrubber/dryers

BA/CA 430S/510S

The intelligent design ensures fast effective floor cleaning

- **A compact and reliable scrubber/dryer**
- **Ergonomic adjustable handle design reduces operator fatigue**
- **Assymetric brush allows cleaning right to the edge**
- **Low noise level allows daytime cleaning (65 dBA)**

30

A series of automatic walk-behind scrubber/dryers manufactured to offer an extremely attractive cost benefit ratio. BA/CA 430S/510S cleans and dries the floor in one single pass, even when turning. And its compact design lets it clean right to the edge, even in congested areas.

Scrubber/dryers

BA 550/650

Heavy-duty for tough cleaning tasks

- Ergonomic handle reduces user fatigue
- Brush click on/off
- Adjustable brush pressure
- Front and rear tank filling options

Nilfisk BA 550/650 is a high-speed automatic scrubber/dryer for heavy-duty and tough cleaning tasks. Ideal for cleaning the floor, or stripping it for re-finishing, in shopping centres, airports, railway stations, supermarkets, warehouses, factory floors and hospitals.

BA 750/ST/850/ST

Experience and innovation results in a new generation

- "One touch" scrubbing
- Adjustable brush pressure, from 11 to 102 kg
- Triple corrosion protection
- Brush click on/off (optional on BA 750/850ST)

Nilfisk BA 750/850 and BA 750/850ST is a range of professional scrubber/dryers covering all heavy-duty floor cleaning applications. This series is the perfect choice for large area cleaning such as shopping centres, airports, railway stations, supermarkets, warehouses, factory floors and hospitals.

Scrubber/dryers

BR 850/C/C-XL

40% faster scrub and sweep in one pass

- Highly manoeuvrable for efficient cleaning in confined areas
- Optimal operator comfort
- 147 litre solution and recovery tanks permit long non stop cleaning
- Available with either disc (BR 850), cylindrical brush (BR 850C) or cylindrical brush (850C XL)

Due to an extremely high working speed, Nilfisk BR 850/850C/850C-XL cleans up to 40% faster than a walk-behind scrubber/dryer with the same working width. These are perfect for cleaning large floors in commercial centres, airports, shopping malls, hospitals, factories, and industrial premises.

BR 1100/C/C-XL

High productivity machines for heavy-duty cleaning

- Cleans up to 6200 m² per hour
- Simple to drive (one touch operations)
- Brushes and squeegees easily changed without tools
- Rugged construction gives long machine life and low operating costs

With disc or cylindrical brush models, Nilfisk BR 1100/1100C/1100C-XL is perfectly suited to all heavy-duty large area cleaning tasks. Ideal for cleaning in airports, car parks, commercial premises, warehouses and production manufacturing areas.

Sweepers

Models are available for every conceivable sweeping job. From compact walk-behind units, to large, heavy-duty ride-on models, there is a sweeper in our range that meets your needs in the most efficient way possible. Indoors or Outdoors – and many with versatile dual power supplies that allow them to be used just about anywhere.

They are all designed with our famous attention to detail, meaning that they are simple to operate, easy to service and maintain, and they all feature dust-free sweeping. In particular, take a look at the SR 1800. It's the top-of-the-line ride-on sweeper that offers some of the best features ever for a sweeper in this class.

Sweepers Overview

SW 655S

Three times faster than manual sweeping

SW 700S

Dust-free sweeping for smaller and confined areas

SW 850S

For medium-sized sweeping jobs

SR 1005

Compact ride-on versatility

SR 1100

Remarkably low running costs

SR 1300H

The compact high dump ride-on sweeper

SR 1500H

Setting a new standard in sweepers

SR 1600

Fast, efficient sweeping of large indoor and outdoor areas

SR 1800

Top line sweeping performance

Sweepers

SW 655S

Three times faster than manual sweeping

- Strong, lightweight design
- Easy to manoeuvre and empty
- Side brush pulls debris away from walls, kerbs, pallets and is simply raised when not needed
- Virtually no service required

Nilfisk SW 655S is a walk-behind sweeper. It sweeps three times faster and more thoroughly than a broom, saving time and labour costs. It keeps your surroundings neat and litter-free with minimal cost and effort. Use it indoor on floors or outdoor on paths, roads, parking lots, petrol stations etc.

SW 700S

Dust-free sweeping for smaller and confined areas

- Durable polyethylene construction resists corrosion
- One piece hopper on wheels with handle for easy dumping
- Adjustable driver handle to match operator height
- Excellent cleaning result, also on carpeted surfaces with the soft main brush

Nilfisk SW 700S is a walk-behind sweeper for small and narrow areas. Simple to use anywhere by anyone. The SW 700S is six times more productive than cleaning with traditional brooms. Ideal for cleaning offices, exterior-parking areas, warehouses, garages or factories.

SW 850S

For medium-sized sweeping jobs

- **Durable polyethylene construction resists corrosion**
- **Flap system allows collection of bulky debris**
- **Requires no tools for main or side brush adjustment and replacement**
- **Requires no tools for dust filter replacement**

Nilfisk SW 850S is a larger walk-behind sweeper with a higher sweeping and loading performance to satisfy wider and more open spaces. Ideal for cleaning offices, exterior parking areas, warehouses, garages or factories.

Sweepers

SR 1005

Compact ride-on versatility

- Turning circle of 2 metres
- Side brush moves inwards against impact
- Requires no tools for main brush, side brush and dust filter adjustment or replacement
- Vacuum cleaner on board available

Nilfisk SR 1005 is the most compact ride-on sweeper compared to competitors' ride-on sweepers with similar capabilities. Gets into narrow areas and cleans in places where no other ride-on can go. And its productivity is double that of a walk-behind sweeper!

SR 1100

Remarkably low running costs

- Self levelling and adjusting main brush system (patented)
- Variable side brush rpm and automatic electric filter shaker
- Climbs up 20° slopes whilst sweeping and at full load
- Requires no tools for dust filter, main brush and side brush adjustment or replacement

Nilfisk SR 1100 is an extremely versatile ride-on sweeper that assures maximum performance in various environments and on different applications. Ideal for outdoor parking lots, pathways, or loading bays, to indoor sweeping in warehouses, factories or other industrial settings.

Sweepers

SR 1300H

The compact high dump ride-on sweeper

- Largest hopper volume in its class, hydraulically operated to dump into bins up to 1,42 m high
- Climbs slopes up to 20% (P/D versions)
- Requires no tools for dust filter and main brush adjustment or replacement
- Available in Battery, Petrol, LPG and Diesel versions

Despite its compact design, Nilfisk SR 1300H is a big performance ride-on sweeper with a cleaning capacity of up to 10.800 m² per hour. It is ideal for outdoor and indoor sweeping applications, such as parking lots, pathways, railway stations, loading bays, warehouses, and industrial settings.

Sweepers

SR 1500H

Setting a new standard in sweepers

- With its 1,45 m fully hydraulic high dump, emptying is easy and the hopper contains up to 350 l
- A large capacity, 8,5 m² polyester cloth filter provides maximum retention of fine dust over long working shifts
- SR 1500H features intuitive controls for easy, immediate operation
- Internal components are easily accessible for quick, easy maintenance

When time is precious and high performance imperative, the SR 1500H is the sweeper to choose. Suitable for indoor industrial applications and outdoor parking areas, this heavy-duty machine efficiently sweeps up to 15.000 m²/hour.

Sweepers

SR 1600

Fast, efficient sweeping of large indoor and outdoor areas

- No tools necessary for brush and filter adjustment or change
- Hopper access door for manual loading of large debris
- Electric filter shaker
- Rear traction and steering wheel for higher manoeuvrability

Nilfisk SR 1600 is a large ride-on sweeper with high dump system. Ideal for large warehouse floors, factory walkways, car parks and shopping centres - they can be cleaned at minimum cost and minimal disturbance. The front position of the hopper ensures an excellent performance in very dusty areas.

SR 1800

Top line sweeping performance

- Huge 425 litre hopper can carry 540 kg of waste and is hydraulically raised to dump up to 152 cm high
- 2,9 m left/ right turning radius for manoeuvrability
- All sweeping and dumping operations done safely from operator's position
- No tools are needed to adjust or replace dust filter, side and main brush

SR 1800 is the most cost-effective solution for the toughest, biggest and most demanding indoor and outdoor sweeping tasks. Maintaining cleanliness in large areas such as factory floors, warehouses, car parks and driveways is important both for safety and for image.

CR 1300

Combination machines

For the versatility of both scrubbing and sweeping in a single piece of equipment, look here! These efficient machines eliminate dust by aggressively scrubbing and sweeping while the floor is wet. Then, in the same pass, they squeegee the floors dry – leaving a surface that's streak free, slip free and spotless

Combination machines Overview

CR 1300

*Compact ride-on
scrubber/dryer with wet-
sweeping system*

Combination machines

CR 1300

Compact ride-on scrubber/dryer with wet-sweeping system

- **No tools necessary for major adjustment and part replacement**
- **Rugged and long lasting polyethylene solution and recovery tanks**
- **21 litre rust proof steel hopper**
- **Centre pivot squeegee and squeegee blades for maximum water pick up**

Designed to clean large areas, Nilfisk CR 1300 scrubs, sweeps small debris, and dries the floor all in one pass. CR 1300 is perfect when floor cleaning is more than merely for cosmetic purposes, in food processing plants, in manufacturing facilities, warehouses, airports, and even in car parks.

Global support

Through our close co-operation with the world's largest suppliers of batteries, we are able to offer service, technical support and warranty back-up on a global basis. In addition, the partnership between Nilfisk-Advance and these battery producers ensures a full understanding of local market conditions wherever our customers are located.

The Nilfisk-Advance quality control

Before leaving the factory, each and every Nilfisk-Advance battery operated machine is fully tested. Within this facility we have the capability to fully service, install and test all battery driven machines to ensure maximum performance and minimal downtime for our customers. For us, it is essential to ensure that there always exists the optimum balance and relationship between the machine itself and the battery that is driving it. Quality is the key word in all Nilfisk-Advance activities.

Types of batteries available:

In general all batteries offered for the various floor care machines in the Nilfisk-Advance range are

standard "traction batteries" in the conventional acid filled type or as maintenance free.

As a low cost alternative we offer a few "semi traction" mono block batteries, (acid filled)

The semi traction monoblocks have "traction" characteristics but fewer cycles, only 800 cycles.

A traction battery is manufactured in a way that allows it to be discharged over a long period of time (5h), the opposite to a starter battery for a car, which is made to be discharged rapidly and to give max power to start a car or the like.

Battery cycle:

A battery cycle is defined as a discharge of the battery to max.80% (70%) followed by a charging period.

The best rhythm for a battery is to have one cycle per 24-h period. More cycles per day shorten the lifetime of the battery.

Battery lifetime.

Conventional acid filled batteries have a lifetime of app. 1500 cycles. Maintenance free batteries have a lifetime of app. 900 -1000 cycles.

Semi traction acid filled batteries have a lifetime of app. 800 cycles.

Realising that cordless operation is often essential in productive utilisation of cleaning equipment, Nilfisk-Advance has assembled a wide range of batteries and chargers to suit all needs. All of these products come with full EU certification. Our chargers are designed for either single- or three-phase power supply, while the batteries come with optional automatic water filling. Maintenance free, conventional acid batteries or batteries without acid are available.

Batteries

Service

Service

There is more to a Nilfisk-Advance product than the guarantee that cleaning jobs are performed quickly, effectively and economically. Our high quality products are supported by an equally high quality service organisation that works to eliminate downtime and maximise running-time, ensuring productivity savings and extended operating life for the equipment. Service packages, customised to meet your specific needs, are

available to secure optimal service support for your machine.

Nilfisk-Advance's centrally co-ordinated service network offers a wide range of benefits :

- Guaranteed service within 24 hours performed by specially trained service technicians (Europe)
- Spare parts on hand from the service technician's service van (Europe)
- The option of preventative maintenance with fixed service intervals
- Extended machine lifetime
- Minimised risk of downtime and damage

Training

Thorough and expert training is the backbone of our service policy. Properly trained technicians, able to both repair and carry out preventative maintenance, represent the most effective means of reducing the risk of expensive breakdowns.

The company's service training centre in Italy is a state-of-the-art facility where our regional trainers, the technical specialists receive extensive and in-depth training to be able to deal with every

conceivable service and breakdown situation.

Our experienced local service staff undergo regular training sessions on new and existing products from these technical specialists. This training at central facilities is then supplemented with local and on-site training. As you can see, our service staff never stops learning, and training is therefore an on-going continuous development.

Customised contracts in Europe

We offer three different basic types of service contract. However, since actual service packages may vary from country to country, we recommend that you contact your local Nilfisk-Advance representative concerning the available options.

1. Full Service Contract

Offering full maintenance and service at a known, fixed cost, the full service contract provides peace of mind.

By providing regular preventative maintenance, worn and damaged parts are repaired and replaced before the machine breaks down.

Maximising productivity for the equipment at a price that can be budgeted for makes good economic sense. The cost includes labour and travel, plus spare parts used. The agreement specifies the number of visits and covers normal usage.

2. Standard Service Contract

This contract provides regular preventative maintenance visits by our trained technicians to inspect and maintain the equipment. The price includes labour and travel costs but not parts fitted during the visit.

3. Subscription Contract

The subscription contract specifies that payment is made after each visit by the service technician. In this contract the customer agrees to a minimum of one visit per year.

European coverage

Only a phone call away, Nilfisk-Advance has 180 trained, professional service technicians in the field throughout Europe. Supported in turn by authorised service dealers, same day coverage of emergency calls is virtually guaranteed. This dedication to offering the best possible support on the machines we supply is a key element in the overall commitment to quality in all phases of Nilfisk-Advance's operations.

Coverage on other markets

We offer different optional service and preventative maintenance contracts adapted to the local conditions. Through these agreements we can minimise the risk of downtime and damages as well as extend the lifetime of the machines.

Since the service packages are adapted to the conditions in each country the local Nilfisk-Advance representative can give you detailed information of the service package available.

Single discs & Burnishers

Hard floor cleaning can be fast and easy with the right tool. Our wide range of efficient, multi-purpose single disc machines and burnishers offer high productivity savings in scrubbing, wet and dry stripping, polishing, spray cleaning or burnishing your hard floors to make them last longer and look better. And remember, a clean floor is a safer floor.

Make light work of the heaviest floor cleaning jobs by using the best designed single disc floor machine or burnisher in the business. From Nilfisk-Advance of course.

Single discs / Burnishers

PS 333A

Compact machine for small areas

- Easy and safe to use, features built in safety grip
- Individually adjustable handle bar
- Easy to transport between cleaning locations
- Easy to clean under low furniture

Nilfisk PS 333 A is a low speed single disc machine. Easy to use as all functions are controlled from the operator handle with a built-in safety grip. PS 333 A is designed for maintenance, light scrubbing and polishing of hard floors.

421 A

Low speed unit for medium duty applications

- Ergonomic design to minimise stress and fatigue
- Aggressive deep cleaning due to more torque
- Gearbox drive for tough cleaning jobs
- Motor overload protection switch

Nilfisk 421 A is the classic medium duty single disc machine. The combination of high brush pressure and torque speeds up cleaning time and makes the job faster and easier. A helical gear drive for the brush provides uniform power transmission and added safety in tough cleaning situations.

510B/510B-3

Industrial workhorse

- Ergonomic design to minimise stress and fatigue
- Aggressive deep cleaning due to more torque
- Gearbox drive for tough cleaning jobs
- Motor overload protection switch

Nilfisk 510 B and 510B-3 are robust heavy-duty single disc machines for industrial cleaning. High cleaning power due to extra torque ensures exceptional results in both wet and dry cleaning. The ergonomically located controls are within easy reach for operator comfort.

Single discs / Burnishers

SD 2

High efficiency at a low noise level

- Easy to use, even for untrained operators
- Extremely low vibration
- Smooth and quiet operation
- Ergonomic design minimises stress and fatigue

Nilfisk SD 2 is a low speed single disc machine for all basic cleaning tasks (light to medium duty). It is designed with special attention to health and safety. SD 2 is ideal for polishing, spray cleaning, scrubbing and stripping hard floors and bonnet mopping carpets.

545

With the Nilfisk 545 productivity increases by 60%

- Up to 60% labour cost savings
- Extends the floor's life and improves it's appearance
- Minimised water and chemical consumption
- HEPA filter available for clean room applications

Nilfisk 545 is a high-speed single disc machine with 3-step integrated active dust extraction. This allows dust-free, polymer film coat renovation, by cleaning and polishing hard floors without the inconvenience of conventional methods using water and chemicals.

SD 4

High speed, high efficiency and low noise level

- Extremely low vibration
- Easy to operate and manoeuvre (low weight, large wheels and wide wheel base)
- Ergonomic design minimises stress and fatigue
- Ultra stable due to unique active suspension system

Nilfisk SD 4 is an ultra stable high-speed (400 rpm) single-disc, due to a unique active suspension system. It is designed with special attention to health and safety. The ergonomically located controls are within easy reach to reduce strain. Ideal for polishing, spray-cleaning and dust collection.

Single discs / Burnishers

BHS 5120

Battery powered performance

- Covers 1600 m²/hour
- Built in dust collection
- Dual collector filter bags
- Low noise level

The BHS 5120 is a 2000 rpm walk behind battery burnisher, with dual collector bags to catch and hold the dust to prevent dust mopping after burnishing. A free floating pad drive mechanism ensures a uniform floor finish.

BHS 7014

Burnish in half the time

- Covers 3500 m²/hour
- Built in dust collection eliminates the need to mop after burnishing
- Optional quick battery exchange kit doubles run time to 3,4 hours
- Adjustable seat and steering wheel

The BHS 7014 Ride-on battery burnisher is the fastest way to get the high shine finish so popular in today's retail centres, hospitals and other public areas.

AX 300/400
AX 650
BRX 700

Carpet extractors

For quick and more economical carpet cleaning we recommend our carpet extractors where you can choose between box extractors, where the cleaning solution is sprayed into the carpet to loosen the dirt which is picked up afterwards. For larger areas you choose the automatics where the injected cleaning solution is agitated with a brush to get a more effective dry and cleaned carpet in a single pass.

Carpet extractors Overview

UC 912

High-suction carpet extractor

AX 300/400

Automatic carpet extraction

AX 650

The most technological carpet extractor on the market

BRX 700

The first industrial, multitasking ride-on sweeper/extractor

Carpet extractors

UC 912

High-suction carpet extractor

- High suction capacity
- High drying capacity
- Easy to manoeuvre
- Versatile, can be used as a standard wet pick up

AX 300/400

Automatic carpet extraction

- Efficient one pass cleaning of both soft and hard floors
- Compact, easy to manoeuvre
- Easy pull design
- Hard floor nozzle kit available

Nilfisk UC 912 is the carpet extractor you need where spills occur or dirt gets tracked in and limited areas of carpet cleaning is needed. Just wheel out the UC 912 and it's pressure, combined with excellent vacuum recovery, leaves the carpet clean and dry.

With Nilfisk AX 300/400 you can deep-clean carpets in one single pass. Built-in brush action ensures superior cleaning, and a three-stage vacuum motor provides excellent solution pick-up. Use Nilfisk AX 300/400 to power clean the dirtiest carpet or the roughest hard floor surface.

Carpet extractors

AX 650

The most technological carpet extractor on the market

- **Dual purpose ability allowing interim cleaning or deep restoration cleaning ("Maintenance" mode or "Restoration" mode)**
- **Brush deck can slide out 13 cm for edge cleaning along walls**
- **A 151 litre solution tank ensures long cleaning time without stops**
- **Easy maintenance (brush, vacuum shoes and vacuum motors are removable without any use of tools)**

Nilfisk AX 650 battery-powered automatic carpet extractor cuts operation costs with longer run-time and by minimising operator dumping and refilling time. Unique to the AX 650 is its dual-purpose cleaning capability, interim and deep cleaning of carpets.

Carpet extractors

BRX 700

The first industrial, multitasking ride-on sweeper/extractor

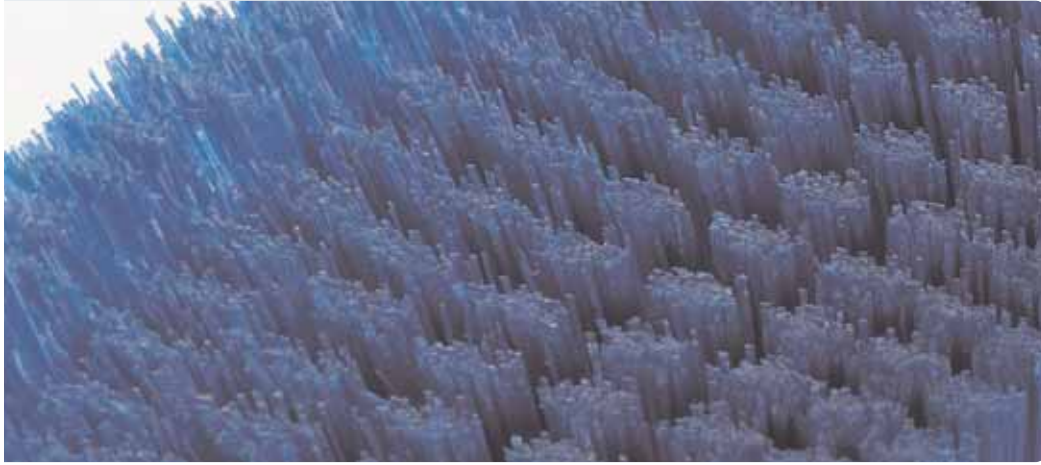

- Cleans up to 1720 m² per hour in low moisture mode
- 160 cm turning radius and can fit a 83 cm doorway
- One touch control, excellent driver visibility
- Dual vacuum unit enables quick dry time

60

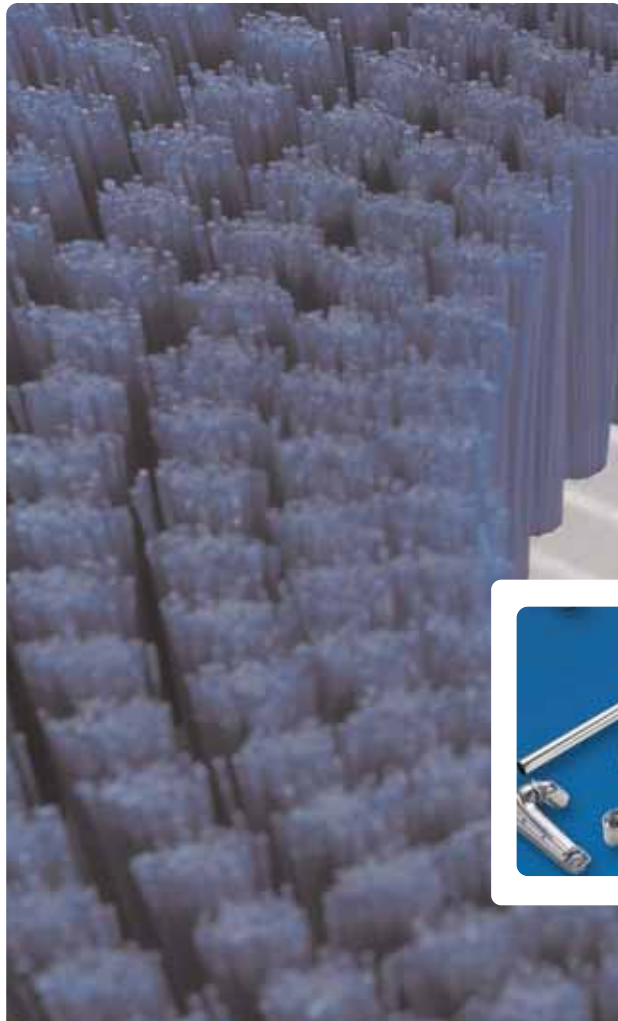

The BRX 700 is designed to eliminate vacuuming before extracting by sweeping and extracting in one pass! With the wide 71 cm cleaning path and 170 litre solution tank, productivity is increased by 400% compared to standard method.

ACCESSORIES

Every cleaning application is special, and to get the best out of the machines you buy it is important to have the right accessories to go with them. Whether it's special nozzles for your vacuum cleaner, brushes for your scrubber-dryer or special filters for sensitive-area cleaning, we can provide the right solution to help you clean better. The right accessories not only enable the cleaning job to be done in the fastest and most efficient way, they also help to prevent damage to the machine and reduce maintenance costs. All products carrying the Nilfisk-Advance label have been fully tested and are guaranteed for use with our equipment.
