

ZILFISK

compact

I love my Nilfisk

Cute, cuddly and packed with charms, Nilfisk Compact dispels the myth that size is important. This little beauty has suction power to rival machines twice its size, and an air filtering performance that will simply take your breath away. The dust bag is a dream, small but perfectly proportioned to the task. And Compact won't play hard to get when you want those onboard accessories. Just flick open the flap, and Compact reveals all. Light, lovable and with everything in the right places, the Compact is your perfect live-in partner. All your friends will be jealous.

It was love at first sight
